Customer Conference

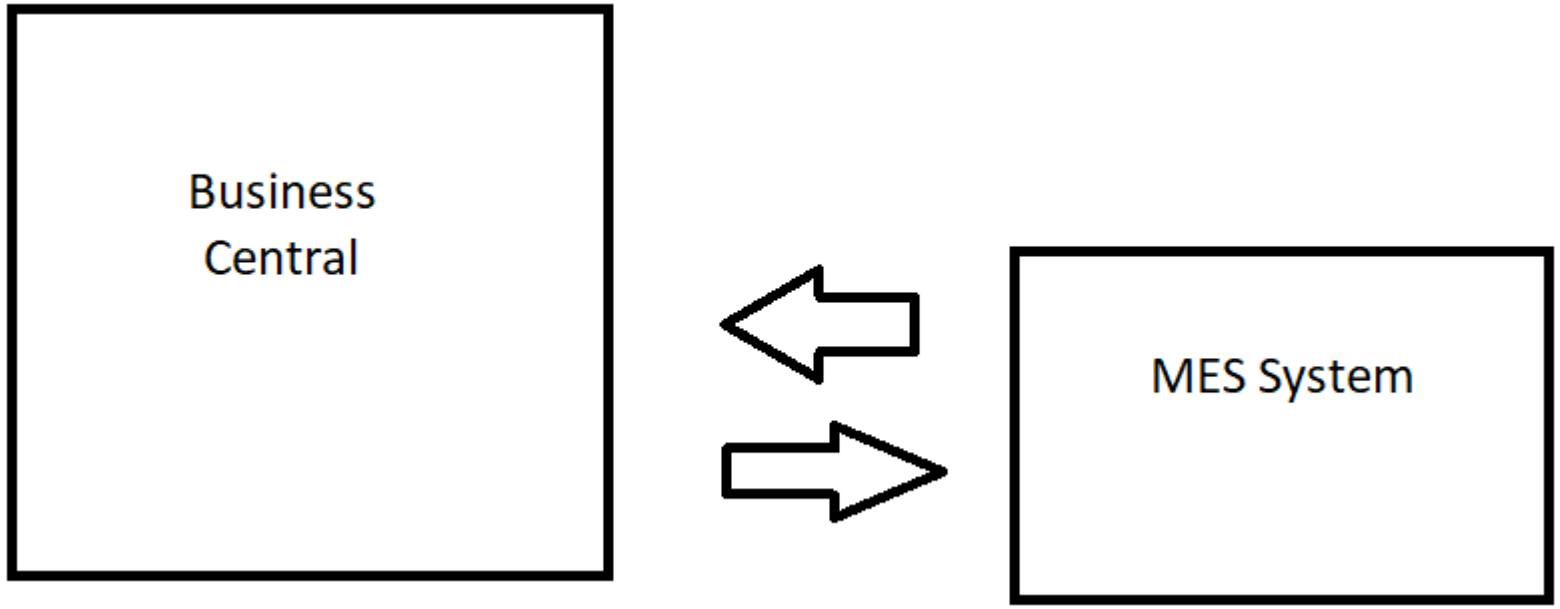
What we're looking at today

- Automated postings in BC
  - The Problem
  - Design
  - Solution
  - Code Snippets
  - Other Possibilities

Customer Conference

The Problem

- ✓ Making two systems talk to each other
- ✓ Purchase, Sales, Production, Inventory…



Customer
Conference

The Design

- ✓ How to recreate manual efforts
- ✓ Resetting values
- ✓ “How would Business Central do it?”
- ✓ Item Tracking?
- ✓ Errors?

The Solution

- ✓ Staging Table Style integration
- ✓ 17 working transaction types
  - ✓ Sales
  - ✓ Purchase
  - ✓ Production
  - ✓ Transfers
  - ✓ Inventory
- ✓ Custom Business Rules

Customer Conference

The Solution

- ✓ Modules
- ✓ Commits
- ✓ Interactive Page for watching transactions

```
trigger OnRun()
begin
    Code();
end;

1 reference
local procedure Code()
var
    Transaction: Interface INVCMESTransactionable;
    Type: Integer;
    TransactionsTypes: List of [Integer];
    i: Integer;
begin

    for i := 1 to 2 do begin

        SetFailedErrorToNew();

        TransactionsTypes := Enum::"INVC MES Transaction Type".Ordinals();

        foreach Type in TransactionsTypes do begin
            Transaction := Enum::"INVC MES Transaction Type".FromInteger(Type);
            Transaction.DoAction();
        end;

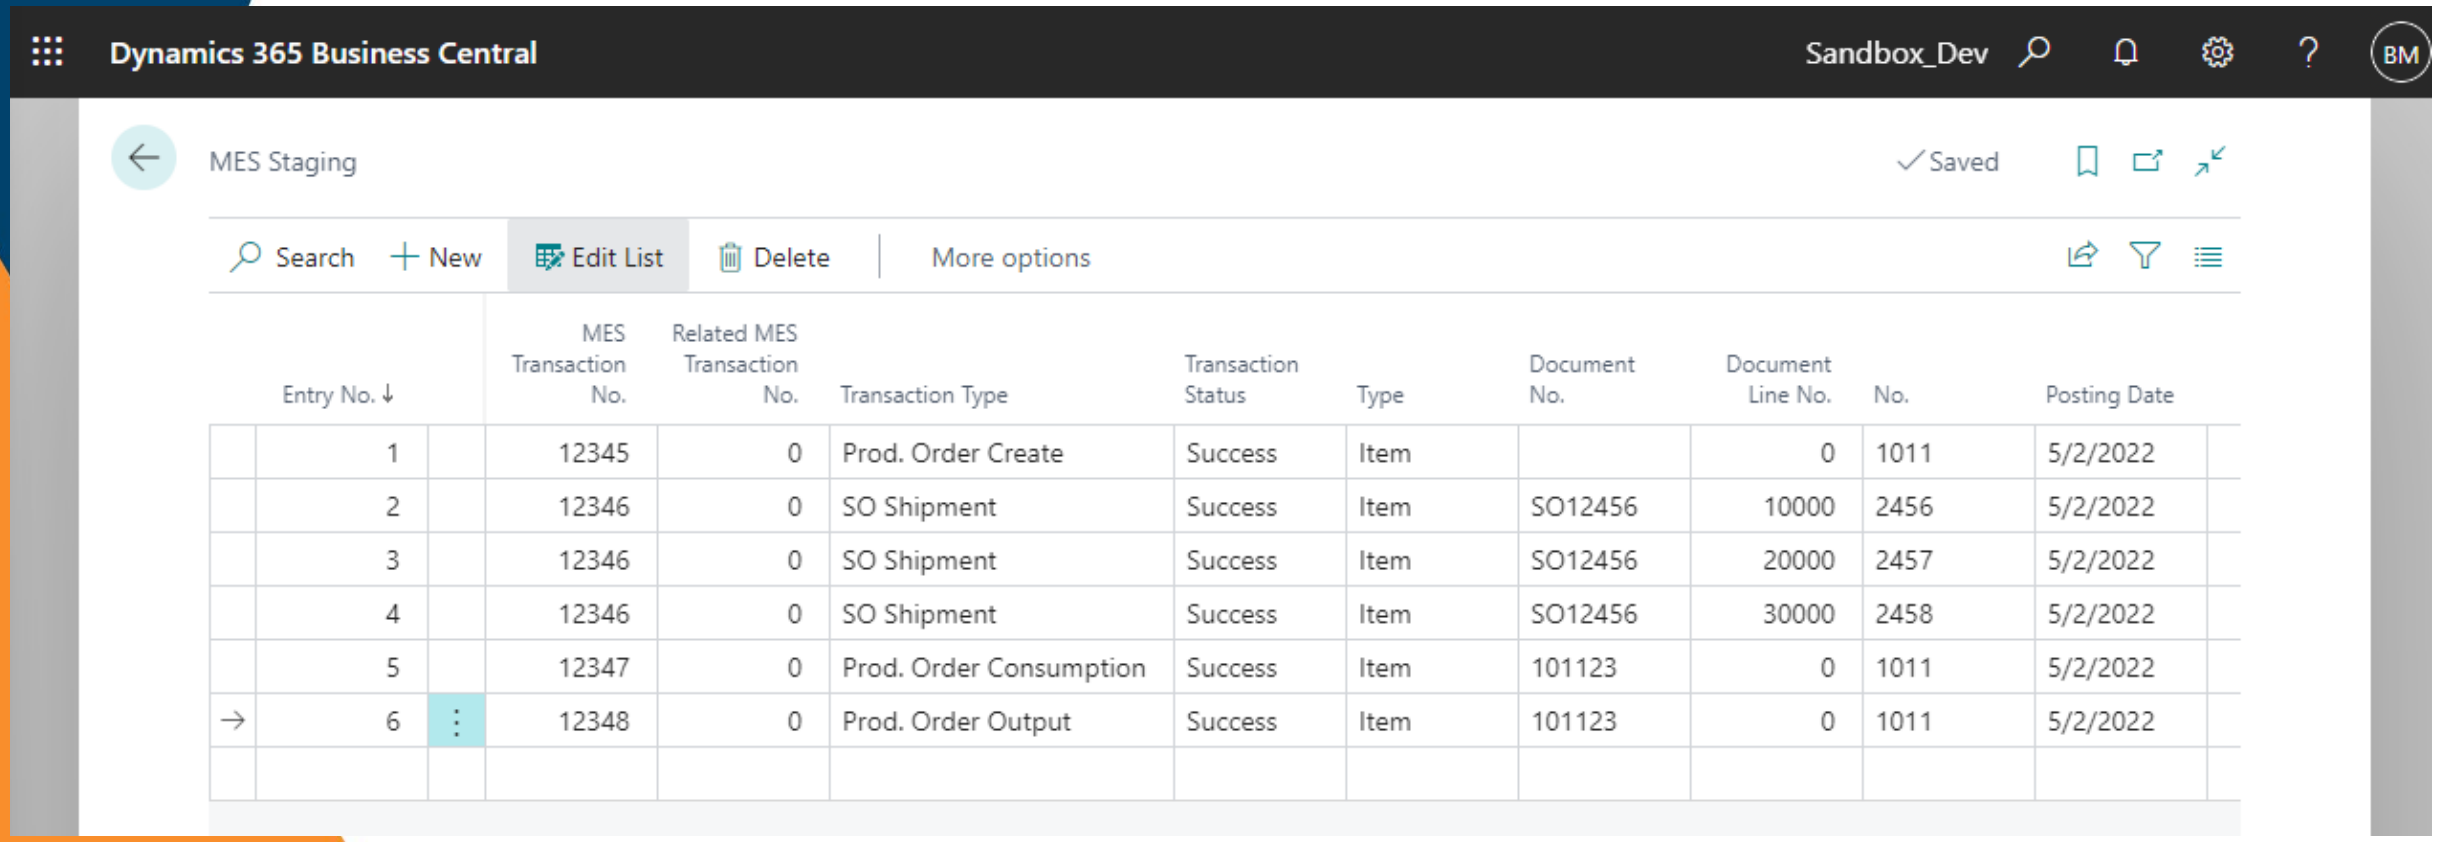
    end;
end;
```

Customer Conference

Real Use

- ✓ Thousands of “Transactions” / Day
- ✓ Minimal User impact
- ✓ Automated by Job
- ✓ Manual Control

Real Use



Entry No.	MES Transaction No.	Related MES Transaction No.	Transaction Type	Transaction Status	Type	Document No.	Document Line No.	No.	Posting Date
1	12345	0	Prod. Order Create	Success	Item		0	1011	5/2/2022
