Drive Productivity and Easily Prioritize Shipments with OWR

7 Reasons you'll want to use Outbound Warehouse Request (OWR):

1. Available for BC users whether or not WMS is in use
2. Can grow along with your business
3. Provides a planning tool to ship new orders
4. See all orders pending shipment and all orders without picks scheduled
5. Prioritize picking of orders your way, based on multiple filters ($, package carrier, customer, complete orders, etc. -- including custom ones you design)
6. Soft allocation of inventory prevents multiple people from picking the same item
7. Great visibility for Warehouse Managers & Customer Service Representatives
