- ✓ Job reports
- ✓ Questions & Wrap up

What is the job module in NAV/BC and how can it be used?

Jobs represent projects.

In the job module, you can perform project management activities such as scheduling activities, allocation of resources, approval of timesheets and other project management activities.

It can also be used to track various costs such as employee hours, inventory, expense usage etc. as the job progresses.

Let's dive into business central to review jobs
