We believe that **time** is
the most valuable
asset, in both business
and life.

A person's hands are visible, holding a sign that says "HELP" and another hand is raised in a gesture of helplessness. The hands are emerging from a large pile of crumpled paper. The background is a solid grey color.

Had enough?

Non-value-added activities (manual data entry, tracking, follow up)
Errors with data entry, manual matching, and approvals
Time wasted researching and finding answers
Scrambling to meet deadlines
Circumvented controls
Manual document creation and distribution
Irregular communications with customers and vendors
Etc. etc.

Had enough?

Non-value-added activities (manual data entry, tracking, follow up)
Errors with data entry, manual matching, and approvals
Time wasted researching and finding answers
Scrambling to meet deadlines
Too much wasted time
Circumvented controls
Manual document creation and distribution
Irregular communications with customers and vendors
Etc. etc.

Our time-saving solutions

Zero-touch, error-free invoices and other documents

Make expense reporting fun!

Automated customer and vendor communications

The *only* process automation solution built specifically for Business Central

Impact & Results

We have 45 companies... and the system figures out where it needs to go to. It is quite impressive!

Monique Jaqqam
CFO, Basecamp
