Headaches and Pain Points

- ✓ No visibility
- ✓ No planning ability
- ✓ Difficult inventory allocation

INNOVIA CONSULTING

Pro-tip: Dates!!

- Dates MUST be managed on all documents to allow for a better flow within the warehouse.
  - If dates are not maintained, receiving will not know when to expect materials
  - Pickers/packers/shippers will not have a good understanding of order urgency.
  - Sales cannot set realistic expectations for customers
