CSM – A Complete, Multi-Channel, eCommerce Management System

ABOUT CSM BY SUITE ENGINE:

At Suite Engine, we support complex, multi-channel businesses and processes by creating plug-and-play solutions for Business Central. With CSM, get total visibility for orders, listings, inventory, and payments. Connect Amazon, Magento, Shopify, and more.

CHANNEL SALES MANAGER

Tired of multiple reports and disparate systems that only show a piece of the puzzle?

Automate and Sync. Every order. Every channel. In one place.

Fully automate your eCommerce and Microsoft Dynamics 365 Business Central / Business Central systems.

Avoid Sales Fulfillment Errors

Workflow automation and complete sales order visibility helps you achieve what matters most to your customers – accurate and faster order processing.

CSM is not just a connector - It's the central hub for your omnichannel sales strategy.

Manage multiple stores (B2B, retail, specialty) and easily measure their financial impact.

See what customers are saying:

"With Channel Sales Manager, we've improved our supply chain management in terms of quantity sharing, synchronizing prices on each channel, and time savings on order processing."

– Jerry Qu, Owner/President, Qbedding

Why Dynamics 365?

Modern applications

Modern applications that deliver new experiences and connect with a business' existing systems to allow organizations to digitally transform their way.

Applications that use mixed reality, the ability to take an application that overlays on the reality in front of the user, that guides them through a business process like never before. Connect to information from social networks, mobile devices, and micro-applications to drive intelligence and inform a more effective business process.

Unified data and processes

Unified data and processes that enable business without silos. Centralized data enables disparate groups to work together effectively with a single, trusted view of processes, relationships, and data. Data connectors allow thousands of systems to bring their data to a single network.

Intelligence that delivers

Intelligence that delivers actionable insight. Data in the new world includes social, relationship, and productivity information in addition to insights generated by business systems. The right solution requires a unified approach that allows companies to automatically leverage their data to decide and act in real-time with expanded analytics, predictive algorithms, and automated AI.

An extensible environment

An extensible environment that enables change. The right solution establishes a data, communication, and application environment that makes it easy to evolve and extend existing business operations, while introducing technologies that enable users to create solutions where no solution exists and to expand data analysis.

Transform on your terms with Microsoft Business Applications. Enable people to do their best work. Gain actionable insights. Thrive with solutions expressly built for change. Unlock next.

Key use cases

Sales

Respond to changing business requirements with a flexible platform to rapidly create new solutions and ensure old solutions are never truly finished.

Service

Understand your customers better and respond more quickly by accessing internal and external relationship data.

Finance and operations

Increase your return on investment with Microsoft's agile and efficient cloud solution.

Talent

Extend your virtual team and coordinate faster with a consolidated view of team members, activities, and responsibilities.

Marketing

Gain end-to-end visibility by connecting data from external markets, social, and legacy sources.
