

Let Dynavision Promotions lead the way, and watch your profits rise today!

Your ultimate promotion wizard! Easily design captivating and lucrative promotions for your products, both simple and complex, with our user-friendly app. Increase sales, engage customers, and drive business growth effortlessly.

Challenges addressed

- **Manual Promotion Handling Leads to Errors:** Applying promotions manually can result in mistakes & inconsistencies.
- **Time-Consuming Setup:** Creating and managing complex promotions requires significant effort, slowing down sales.
- **Limited promotion functionality:** Overcome the constraints of standard functionalities.
- **Inconsistent Promotion Application:** Ensure promotions are applied accurately across all sales documents.

Requirements Covered in Business Central Projects

- Design & manage (complex) sales promotions (Buy One Get One, X% discount, ...) in Business Central.
- Ability to create instant & template based promotions.
- Ability to create promotions on line & header level.
- Ability to create seasonal or time-limited promotions.

Key features

- **Basic Promotions Wizard:** Effortlessly set up standard promotions like "Buy One, Get One Free" or percentage-based discounts using a guided wizard.
- **Advanced Promotion Templates:** Access a library of pre-designed templates for complex promotions, or create custom templates tailored to specific strategies.
- **Date based Promotions:** Activate promotions immediately or schedule them to run during specific periods.
- **Dynamic Line Promotions:** Design promotions based on document line items, quantities, or product attributes.
- **Header-Based Promotions:** promotions based on customer details or order information, such as location-based offers.
- **Multi-Currency & Language Support:** Operate promotions across different regions with varying currencies and languages.
- **Integration with Sales Document:** Ensure promotions are consistently applied across on orders.
