# RPM – A Complete Equipment Dealership Management System

## ABOUT RPM BY SUITE ENGINE:

RPM enables growing equipment dealerships to consolidate data across all departments, branches, and companies. Our industry knowledge, functionality, and commitment to the equipment industry provides companies an unparalleled option to maximize their revenue and reduce cost.

## WHAT WE OFFER

RPM is an enterprise dealership solution that consolidates insight into all accounting and operations. Capture all revenue (rental, leasing, sales), multiple meter tracking, maintenance (parts & labor), utilization, depreciation, acquisition cost, and asset improvements on each piece of equipment in your fleet.

RPM is fully integrated with Microsoft Dynamics 365 Business Central, including all M365 Apps such as Office, Power Platform, Azure, and more. It's hosted in the cloud by Microsoft, so you never have to worry about security or keeping servers up to date!

Discover a single, comprehensive, modern solution to streamline your data and processes – RPM by Suite Engine!

### *See what customers are saying:*

*"The experience in working with [the Suite Engine Implementation Team] assured us that we made the right decision. We've been able to provide accurate quotes because we now have current item information all on one screen."*

*– Tony Aube, Project Manager, 24HR Safety*
