FEATURES

ERP Integration

- Real-time integration using web services allows you to display customer specific pricing, discounts, promotions, shipping rates, sales tax, inventory, balances, order history from your ERP and instantly process web orders into your ERP.

Catalog & Price Management

- Publish your NAV inventory items online. Supports unlimited products, categories, item variants, unlimited units of measure and inventory levels from NAV
- Multi-product images, attributes, extended description and cross sell & up-sell items.
- Pricing, promotions & discounts are pulled from NAV.
- Advanced full-text search functionality.
- Ajax filtering by attributes or specifications (Color, Size, Style, etc.,)
- Support for Multi-Currency & Multi language.

Payment Integration:

- Full PCI compliance & SSL
- Flexible payment methods (CC, PO, COD-logic, etc.,)
- Ready integration for authorize.Net, Paypal, Chargelogic, etc.

Shipping Integration:

- Real-time shipping rates are pulled from FedEx, UPS, USPS or other carriers. Shipping rates can also be pulled from ERP or eShip tables.

Tax Calculation:

- Sales taxes can be pulled real-time from NAV tables or using Avalara Avatax, Vertex or other tax services.

Order & Account Management:

- New Customers can register online and create a bill-to and ship address
- Support for Guests to place orders
- The shopping cart feature allows users to create a sales quote or sales order right into ERP
- Open orders, closed orders and invoice information can be viewed 24/7 in the account section
- Access to any ERP Report/ Document.

Admin & Marketing Tools:

- Email Campaigns, Newsletters, product cross-sell and up-sell feature
- Built-in CMS to create dynamic blogs, ad pages
- SEO (search engine optimized)
- Responsive solution to support access from any device.

Installation:

- Very few modifications to core ERP objects make it easy to install & upgrade
- Comes with standard templates or ready-made solution for quick install
- Completely customizable using industry standard tools such as Visual Studio
- On-premise or On-Cloud.
- End-to-end implementation and round the clock support.
